

PairEx is a digital asset exchange that helps users make informed decisions with its numerous possibilities and features. Built on a new economic model and employing carefully selected features, the PairEx platform will bring next-generation trading to the cryptocurrency community.

FEATURES

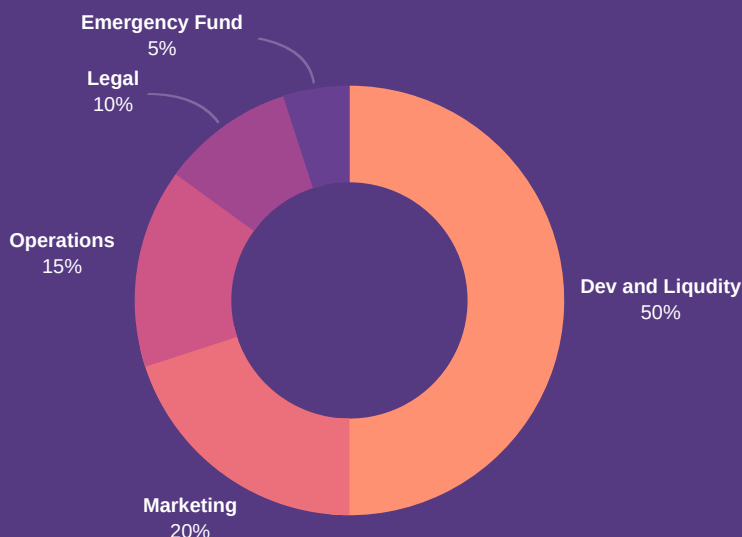

- Cross pair trading - Trade any currency for another irrespective of a trading pair. Pay fee only once when converting from ADA to TRX.
Floating Trade Fee - Trade fee that adjust every four hours to as low as 0.025%; we reduce our share to increase yours.
Speed and latency - Process up-to 10 million transactions per second with less than 5ms of latency.
Strategic Risk Management - Offering optimum entry and exit levels by analysing your portfolio to reduce your risk exposure.
Trading Signalling - Back-test models and see emerging trends based on indicators before applying strategies to your portfolio.
Social Trading Network - Network, discuss and automatically implement/copy strategies of the world's top traders.
Interactive Learning Program - Learn about Blockchain, Cryptocurrencies, Trading, Finance and more with our educational program.
Undisclosed Features - Ground-breaking features yet to disclose due to concerns about copycats and imitations.

PROJECT ECONOMICS

Token Distribution - 120,000,000 RXT

Fund Allocation - USD 9.350,000

Road Map

Team (Currently in stealth Mode)

Developing a solid technology relies on building exceptional teams. At PairEx, we bring the expertise of both Finance and Technology on one drawing board. The following are some innovative and financially focused people working on developing the next big thing!

Table with 2 columns: Team and Advisors, listing names and roles of team members and advisors.
